"You are never too old to set another goal or to dream a new dream"

—Les Brown

Windows Tip—Managing Wi-Fi

Knowing how to manage your Wi-Fi is necessary for accessing the Internet; you need Wi-Fi connection in order to do basic actions like email or social media.

1. Click the "Internet access" icon located at the bottom right of the screen (see right).
2. A list of nearby Wi-Fi connections will pop up. Double-click on the one you wish to connect to.
3. If you are connecting for the first time, you will be asked to enter a security key (AKA password).
4. You can see how strong the Wi-Fi connection is by looking at the number of bars (more bars mean a stronger connection).

---

iPhone/iPad Tip—Managing Wi-Fi

Just like on your computer, Wi-Fi is important on your iPhone/iPad device!

1. Access the "Settings" app from your homepage.
2. Select "Wi-Fi"; it is the second option, right under "Airplane Mode".
3. Make sure Wi-Fi is on. If it is on, the bar next to "Wi-Fi" will be green (see right).
4. Select your desired network from the list that appears. You may be asked to enter a password.
5. Once you are connected, you can see how strong your connection is by looking at the number of bars at the top left of the screen.
