Apple ID

To download apps on your iPhone or iPad, you will need to create an Apple ID. This is often a complicated process for some, and therefore this lab will guide through creating an Apple ID.

1. Open your web browser on your computer.

2. Go to www.appleid.apple.com.

3. This screen should pop up (see below). Click on the blue "Create an Apple ID" button (circled).
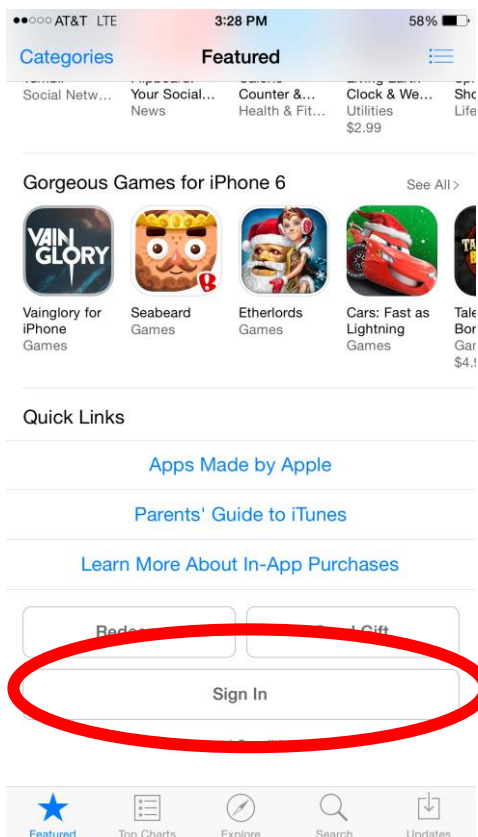

4. Next, you will be brought to a long list of questions and spaces to fill in information. Fill all of it in to the best of your ability, as this is important for later when you use the account.

5. Once you finish that, click the blue "Create Apple ID" button.

6. Now, you have an Apple ID account! Go back to your iPhone/iPad and go to the App Store app.

7. Under the "Features" tab, scroll to the bottom until you see a "Sign In" box (see below).

8. Then, click the "Use Existing Apple ID" button and put in the information you just created for the account.

9. Now, you are free to download apps and perform other actions that require an
Apple ID!
